2. Real Estate and Construction Division

a. Request to PBS for Additional Space

This Office has received informal information that the Agency's request for 50,000 square feet of additional space recently forwarded to the Commissioner of Public Buildings will not be filled because PBS has received a directive to tear down [REDACTED] presently occupied by [REDACTED] presently occupied by State, Veterans' Administration, the military, the District Government, and this Agency. PBS is faced with the responsibility of providing space in the Washington area to replace [REDACTED]. It is understood that this requirement is in excess of the 50,000 square feet to be made available by the evacuation of the Atomic Energy Commission from space in the District which this Agency had requested be made available to it.

b. Telephone Installations

In June a request was received from Liaison Division of OCD for Agency telephone directories for use by Department of State officials. Justification was based on increased operational liaison between the Department and this Agency. Attention was called to the fact that Agency lines are located in other agencies, and through those lines people in such agencies have access to CIA telephone information. Meetings were held with key Agency officials on 15 August relative to the use of these lines. Each official was requested to determine if this type of service is essential to operations, and to submit his findings, including justification, to the Office of Security as soon as possible.
